VivaSEG 1x3 Pop-up Wall Template (Non Aligned)

Template to suit QCodes: Q83171-01 and Q83262-01

NB: this template is to be used where the design is not continuous from the sides to the front and back of the system. If the graphics needs to align, please order the “Graphics Align” option.

This document has three pages; page 1 is an instruction sheet. Page 2 is a template for the front and back of the system, page 3 is a template for the sides.

1. Use this template to open in your preferred editing software for building the print files (such as Adobe Illustrator).

2. Use the following artwork pages of this document to set up your files. Turn off Template and Cut layer visibility - but **do not** delete any layers.

3. Remove this instruction page and save out the artwork pages as individual PDF files.

4. Upload each page to the corresponding line item in your shopping cart or quote.

Please refer to help page on the Vivad website for further instructions if required https://vivad.com.au/help-faq
